

Protecting the Public Through Science

Missouri State Public Health Laboratory

Packaging and Shipping of Division 6.2 Infectious Substances Workshop

At the conclusion of this program participants will be able to:

- Discuss and apply the regulations of agencies with jurisdiction over aspects of packaging and shipping infectious substances and dry ice
- Discuss and apply the correct procedures for classifying, packaging, labeling and documenting shipments of clinical specimens
- Outline responsibilities of the shipper and the shipper's employer regarding training, record keeping and handling of shipments

Agenda:

Registration/ Check-in	8:00
Pre-test	8:15
Regulations and Re-	8:30
Definitions and Classi-	9:00
Packaging, Labeling	9:30
Break	10:30
Packaging, Labeling	10:45
Discussion/ Q&A	11:45
Post-test	12:15
Adjourn	12:30

The United States Government and international transport agencies regulate division 6.2 materials such as cultures and patient specimens containing infectious materials while in commerce. The Department of Transportation (DOT), the International Air Transport Association (IATA), the United States Postal Service (USPS), the Centers for Disease Control and Prevention (CDC) and many private commercial carriers have all published documents regarding packaging and shipping of infectious agents. These regulations and requirements have been created to ensure safe handling and transport of such materials. Strict adherence to these regulations is required to maintain compliance and avoid fines against shipping facilities.

This intermediate-level program is designed for managers, supervisors, safety professionals and laboratorians seeking certification in the transport of division 6.2 materials and dry ice. The course will include presentations, discussion and hands-on portions.

2015 Course Dates

March 25—Jefferson City
April 9—Cape Girardeau
May 13—Springfield
June 17—St. Louis
August 6—Kansas City
September 23—Jefferson City
